**Bull Sale**

# Welcome

Welcome from all of us in the Dakota Power group. We are truly grateful for your interest in our programs and the opportunity to present to you an exciting set of Simmental genetics.

As a group we work together to offer you a set of bulls that are functional. It is a pleasure to work together as a group and bring you a set of cattle that are similar in type and kind, as our philosophies in raising cattle are on the same track. We aim to please, our goal is to offer you the best set of cattle, numbers and genetics available at one place at one time.

This is the most powerful set of bulls we have ever offered. As a group, each and every year we expect to offer you a set bulls superior to those before.

This set of bulls will have what you are looking for. If your need is a heifer bull, growth bull, carcass bull, or just a good one, you will find it here. Look through the offering, find what you like and give any of us a call to discuss your needs. We are always happy to lend a hand in finding the right bull and genetics that will fit your operation.

We are very excited about this 2011 offering. On February 14th, we will bring 3 great groups of bulls to offer you a superior set of genetics.

We thank you, for your interest in our programs and genetics.

# Bull Sale

Selling

## 66 Powerful Bulls

*Blacks, Reds, Percentage and Purebred*

Monday, February 14, 2011 at 1:00 pm CST  
Lunch at 11:30 before the sale.

### **Sale location**

Winter Show Building in Valley City, ND  
South Building

### **Viewing Bulls**

View bulls on Saturday, February 12.  
Also, view bulls all day Sunday and  
Monday view bulls from 9:00 am - 1:00 pm.

### **Sale Headquarters**

American Inn  
280 Winter Show Road  
Valley City, ND 58072  
701-845-5551

### **Auctioneer**

Bill Begger, Wibaux, MT  
406-796-2326

### **Publication Representative**

*the Register* - Kelly Schmidt  
406-599-2395

Sisseton Livestock Rep - Richard Hanson  
605-880-8995  
Lee A. Sagvold, Mcleod, North Dakota  
701-680-9459

### **Sale Terms**

All cattle sell under the recommended  
Sale Terms and Conditions of the American  
Simmental Association and are available by  
request.

### **Delivery**

Free delivery within the state or central  
points. We will provide free keep on the bulls  
until March 15, 2011. After March 15, 2011,  
there will be a charge of \$2.00 per day.

### **Payment Plan**

We require half the purchase price at time of  
sale and the balance upon delivery.

### **Guarantee**

Bulls will be 100% guaranteed to semen test  
and breed. If bulls are taken home to feed until  
March 15, 2011, risk is at the buyer's expense.  
It is suggested that all bulls be insured.

Here is another great set of H60 sons out of NLC Superior who has done good things in the Kevin Thompson program. This set of bulls will really add pounds to your calves. They are all deep sided with a ton of muscle. A full sister sold in the ND Simmental Classic Sale this past December and was one of the top selling open heifers going to Kenner Simmentals. We have said it in the past and I will say it again H60 has been the most productive cows that we have ever had an opportunity to be a part of, it doesn't matter what you breed her to it just works. We have a few embryos left from this great donor but don't take a chance these will be some of the last to sell. Homo Black.

If you are looking for a bull that will calve easy and continue to grow look no further. X038 is sired by Winchester out of a very good first calf Gunner daughter. The dam of this bull is headed to our donor pen very soon. She is about as picture perfect of a cow as you will find. X038 will be tested for polled by sale day.

These red bulls are all full brothers out of our donor cow J893 and Wheatland Bull 740T who is a son of the great THSF Freedom. The J893 cow family has been very productive for us and has left behind some very good daughters. These bulls all weaned off heavy and continue to excel. If you are looking for bulls that will add pounds to their calves look no further. These bulls are all deep red in color with black high lights. We will be testing for Homo Polled.

Here is another great set of H60 sons out of NLC Superior who has done good things in the Kevin Thompson program. This set of bulls will really add pounds to your calves. They are all deep sided with a ton of muscle. A full sister sold in the ND Simmental Classic Sale this past December and was one of the top selling open heifers going to Kenner Simmentals. We have said it in the past and I will say it again H60 has been the most productive cows that we have ever had an opportunity to be a part of, it doesn't matter what you breed her to it just works. We have a few embryos left from this great donor but don't take a chance these will be some of the last to sell. Homo Black.

MM:	6.4	TI: 61
MWW:	24.9	

If it is frame you want 78X will get it to you. 78X is a black son of herd sire 7T. Take a good look at his EPDs, you can wear out your pick-up trying to find better ones. Make sure to look him up at sale time.

# QUICK GUIDE

## to ASA EPDs and \$ INDEXES

**Expected Progeny Differences (EPDs):** EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more *weaning weight* than B. If calving ease were the trait, A would be expected to sire 15-percent more *unassisted births* in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org). Listed below are the units ASA EPDs are expressed in:

**All-Purpose Index (API):** Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

**Back Fat (BF):** Inches of backfat.

**Birth Weight (BW):** Pounds of birth weight.

**Calving Ease (CE):** Percent of unassisted births when used on heifers.

**Carcass Weight (CW):** Pounds of carcass weight.

**Maternal Calving Ease (MCE):** Percent of unassisted births in first-calving daughters.

**Milk (MLK):** Pounds of weaning weight due to milk.

**Marbling (MRB):** Marbling score.

**Maternal Weaning Weight (MWW):** Pounds of weaning weight due to milk and growth.

**Ribeye Area (REA):** Square inches of ribeye.

**Warner-Bratzler Shear Force (WBSF):** Pounds of force required to shear a steak.

**Stayability (STAY):** Percent of daughters remaining in the cowherd at 6 years of age.

**Terminal Index (TI):** Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

**Weaning Weight (WW):** Pounds of weaning weight.

**Yearling Weight (YW):** Pounds of yearling weight.

**Yield Grade (YG):** Yield grade score.

**\$ Indexes:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

**All-Purpose Index (API):** Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

**Terminal Index (TI):** Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

**Using API and TI:** First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years ( $\$50 \text{ diff.} \times 30 \text{ hd.} \times 4 \text{ yr.} = \$6,000$ ). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes
