

Bull Sale

Monday
February 15, 2010

*Winter Show Building
Valley City, North Dakota*

Welcome

from the Dakota Power Group

Welcome from all of us in the Dakota Power group. We are truly grateful for your interest in our programs and the opportunity to present to you an exciting set of Simmental genetics.

I would say this is our strongest set of bulls to date. As a group, each and every year we expect to offer you a set of bulls and females superior to those before.

This set of bulls will have what you are looking for. If you need heifer bulls, growth bulls, carcass bulls, or just a plum good one, you will find it here. Look through the offering, find what you like and give any of us a call to discuss your needs. We are always happy to lend a hand in finding the right bull and genetics that will fit your operation.

We are very excited about this 2009 offering. On February 15th, we will bring 3 sets of cattle together to offer you a selection of genetics.

We thank you, for your interest in our programs and genetics.

Sale Terms

All cattle sell under the recommended Sale Terms and Conditions of the American Simmental Association and are available by request.

Delivery

Free delivery within the state or central points. We will provide free keep on the bulls until March 15. After March 15, there will be a charge of \$2 per day. All bulls that return to the farm will require insurance at buyer's expense. Insurance will be available sale day.

Payment Plan

We require half the purchase price at time of sale and the balance upon delivery.

Guarantee

Bulls will be 100% guaranteed to semen test and breed. If bulls are taken home to feed until March 15, risk is at the buyer's expense. All bulls are required to be insured at the buyer's expense. Insurance will be available sale day.

This Sim-Angus bull is out of a first calf Gambler daughter that has done a super job on her first calf. He has been a stand out ever since he was born. Check out the birth to weaning spread on this individual. This bull is has plenty of capacity and deep sided with a really big hip. W901 is Homo Polled and Homo Black. We are retaining 1/4 semen interest.

This Sim-Angus bull is out of a very good Preferred Beef daughter that consistently raises one of our best calves each year and this year is no exception. W902's maternal brother sold in last year's sale to Begger's Diamond V Ranch in Montana and they have been very impressed with him. We feel very confident that you will be very impressed with this bull. W902 is Homo Polled and Homo Black. We are retaining 1/4 semen interest.

W913 is sired by Wheatland 680S out of a Desperado daughter. We decided to use 680 because of the cattle that we had seen out of him and that he was an outcross to most of our genetics. The 680 calves have been very easy fleshing and extremely deep and thick made. These 680 bulls will add pay weight to every ones cattle. W913 is supper deep made and has a big rear quarter. He will be tested for Homo Black and Polled by sale day. We are retaining ¼ semen interest.

This Red Teddy son is one of the most powerful red bulls that we have light birth weight and heavy weaning weight. If you retain females for your program this bull is your answer, his nine year old dam has a picture perfect udder. She continues to be one of the top females in our herd. Will be tested for Homo Polled by sale day. We are retaining 1/4 semen interest.

Some of you will recognize this pedigree or have bought progeny from Rag MS Zinger 42F. We purchased her 12 years ago from Grant Simmental and watched her hit every year and never miss. 51W will add longevity, milk, eye appeal. Double Polled. Double Black.

**OPEN HEIFERS**

This year we at Triple H Simmentals have decided to cut deep into our replacement pen and offer to you some of our top Simm Genetics females. These female were bred to make mama cows first and foremost. Our females will work in both settings of the cattle industry, as commercial producers or on the seed stock side. Some of our females that we have sold in the past are working the nation's top Simmental herds. These females were feed all together with rest of our heifers and were feed to make cows; they are not over feed and fat but in nice condition for breeding. The sires of these heifers are from some of the industry's leaders, as they will be very maternal females and will make excellent cows. So please take this opportunity to select these quality, Simm Genetics from our program.
